

HOW HEALTHY IS YOUR CAR?

These are 5 easy ways to improve fuel efficiency, reduce carbon emissions, and save money during your daily commute.

- TIRE PRESSURE**
Properly inflated tires are last longer, and can improve your gas mileage by up to 3.3%
- ENGINE TUNE-UP**
Tuning up your engine can improve fuel efficiency by an average of 4% and reduces harmful emissions
- MOTOR OIL**
Improve gas mileage up to 2% by using the grade of motor oil recommended by your car's manufacturer
- EFFICIENT DRIVING**
Hard breaking, fast starts and driving over the speed limit use 39% more fuel and produce 5 times more emissions
- LIMITED IDLING**
Idling your car for around 30 seconds uses more fuel than it takes to start the engine, and produces carbon emissions
